Fasim 2.0 Your global SDS IT solution

Your Dangerous Goods and Safety Data Sheet solution provider

Are you searching for comprehensive Safety Data Sheet (SDS)- and global transport of Dangerous Goods expertise? And are you in need for an intelligent Safety Data management tool, that maintains and generates all your safety documents but also supports your reporting obligations?

Our services

- ✓ **Creation and pro-active maintenance of CLP (European Classification, Labelling and Packaging regulation) and GHS (Globally Harmonized System) compliant**
 - Safety Data Sheets (SDS) for your outbound chemicals
 - Internal Safety Documents (iSD) for all your inbound chemicals
 - Hazard labels
 - Automatic translation into 12 languages at no additional cost
- ✓ **Online, worldwide IT solution Fasim 2.0**
 - Storage of your supplier SDS, iSDs and Workplace Instruction Cards (WICs)
 - Access to Fasim database > 18.000 high quality, validated SDS
 - Regular newsletters
 - Compatible with smartphone and tablets
- ✓ **Support**
 - 24/7 emergency support
 - Helpdesk for all your safety documents, hazard labels and Fasim 2.0 related questions
 - Consultancy on chemical regulations and guidelines (EU REACH, ADR, ICAO/IATA, GHS/CLP) with 25+ years of experience

Your benefits

Through our services, you save time and simultaneously increase the quality of your chemicals management, because:

- Our reliable SDS facilitate reliable safety communication with your customers
- Our different types of safety documents guarantee an advanced level of safety communication up- and downstream the supply chain – internal as external
- Our advanced IT solution Fasim 2.0 saves you time in complying with legislation on the use and transport of chemicals
- Our consultants give you hands-on practical advice and guidance on the transportation and safe use of your chemicals and products

Our online IT solution Fasim 2.0.

Our in-house IT solution is developed for SDS management of inbound and outbound chemicals and easily facilitates reporting obligations you might have.

Fasim 2.0 functionalities

- ✓ Web based tool for SDS and label management
- ✓ Storage of your original supplier SDS, iSD, WIC, GHS hazard label and generation of validated product data
- ✓ Quick access to your safety documents via your own dedicated customer environment
- ✓ All safety documents are instantly available in 12 languages at no additional cost
- ✓ Possibility of multiple user groups with different access rights
- ✓ User friendly interface with advanced search functions
- ✓ Flexible reporting functions; quick check of unwanted chemicals
- ✓ Regular newsletters about updates on chemicals and chemical rules and regulations
- ✓ Simplifies supplier documentation management and archiving
